

THE MOST COMPREHENSIVE SUPPLY CHAIN SOLUTIONS FOR THE LIFE SCIENCES

Cryoport Systems is the premier provider of temperature-controlled supply chain solutions for the life sciences industry. We proudly offer the most comprehensive and flexible solutions to support research, clinical trials and commercial therapies around the world. From master cell storage, cell collection, cryopreservation, logistics, packaging/labeling, kit production and QP services to distributing the life-saving commercial therapy to the patient, Cryoport Systems is able to meet all R&D, clinical, manufacturing, operations and quality needs. Our Integrated Supply Chain Platform brings complete integration and transparency to every step of the journey – delivering certainty to the life sciences.

ONLY AT CRYOPORT SYSTEMS

Integrated Supply Chain Platform

Cryoport Systems, Cell Matters & BioLife Cellular Therapy Services have come together to form a unique Integrated Supply Chain Platform to offer standardized cell therapy collection, cryo-processing, cryopreservation, storage and distribution services. As well as manufacturing, the platform covers all steps of the advanced therapy supply chain to speed up processing and logistics time, standardize collection processes, reduce collection and regulatory workload, and eliminate risks and redundancies. This helps create a scalable, safer and more efficient system for patients, providers and cell and gene companies.

Chain of Compliance®

Get full traceability of the equipment and processes we use to manage the environmental control of your critical materials. This includes equipment performance, commodity history, equipment requalification, calibration history and correlation of in-field events. Chain of Compliance® meets ISO 21973 – General Requirements for Transportation of Cells for Therapeutics Use. Through our technology, we offer the most comprehensive data repository in the industry. A repository which can be accessed for years.

Veri-Clean®

Eliminate the risk of cross-contamination with our validated cleaning and disinfection process, which decontaminates all Cryoport Systems shippers and stainless-steel accessories. This proprietary cleaning methodology reduces external contaminants by 99.9999%.

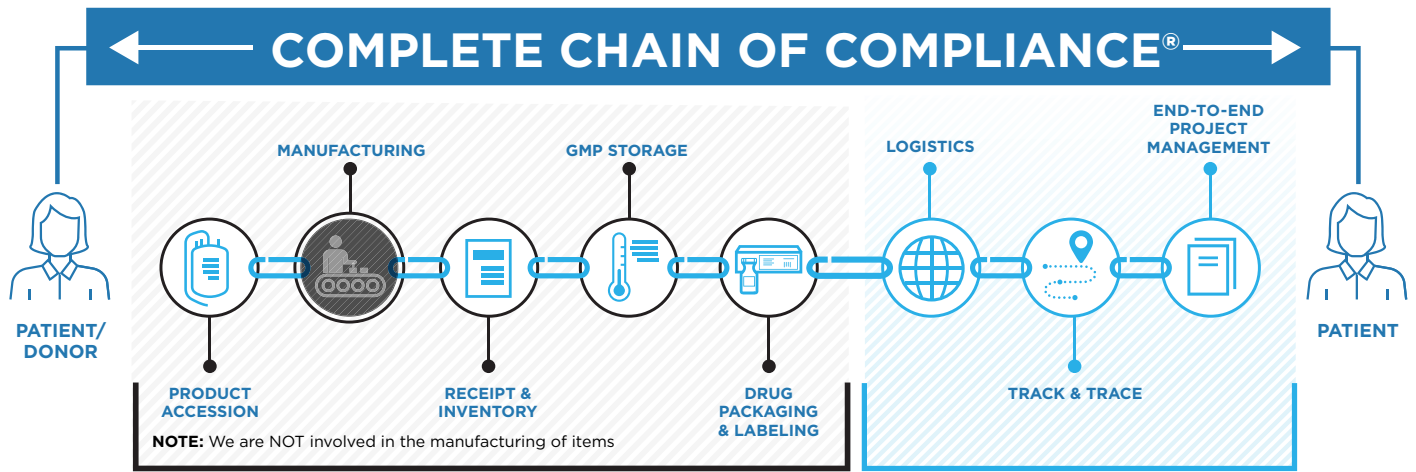

Advanced Therapy Shippers™ (ATS)

The Cryoport Systems ATS line is certified for Human Use Only and was specifically created to be compliant with current – and ready for future – government regulations. The ATS line is the largest and only shipper fleet in the Life Sciences industry dedicated to advanced therapies – both clinical and commercial.

Cryoshuttle® local pickup and delivery

We're proud to provide local pickup and delivery with trained, uniformed drivers, giving you more security for your valuable commodities. This service is also available beyond regular business hours for rush orders and during holidays.

BIOSERVICES

Dedicated to Cell & Gene Therapies

GMP storage

Secure, GMP-compliant, controlled-temperature storage of upstream and downstream materials at all temperatures. Our storage is under round-the-clock, all-day/everyday condition monitoring and data archiving with fail-safe backup capabilities.

Drug packaging & labeling

Secondary packaging and compliant labeling of drug products and other materials. We will work with your team to develop the most effective packaging solution for your unique needs.

Kit production

Both standardized and customized design, production and distribution of your desired type of kits – including apheresis, blood/tissue collection, manufacturing and drug administration.

Drug recall, return & destruction

Handling all aspects of the return process, including coordination with the investigational site and study team, and temporary quarantine storage.

Regulatory services

QP Services: Our EU locations provide Qualified Person (QP) oversight of import and release as required by EU Clinical Trials Directive 2001/20/EC according to Annex16 of the EU GMP Guide.

LOGISTICS

Logistics solutions

Our range includes cryogenic, ultra-cold (dry ice), temperatures of 2-8°C as well as controlled room temperature solutions.

Lab move support

We offer a complete laboratory relocation service, using our reliable cold chain solutions.

24/7/365 tracking and order management

With our online Cryoport® portal, you'll never lose sight of your materials. It includes near real time tracking and in-packing monitoring. Plus, our dedicated around-the-clock customer care team.

Consulting Support Services

Our comprehensive consulting services de-risk the temperature sensitive supply chain with innovative offerings such as:

- Cryo-Process Optimization & Development
- Customized Packaging & Accessory Design
- Shipping System & Packaging Validation
- Shipping Lane Validation
- Shipping Risk Assessment...and more!
